International conferences HICT-2018 and HICT-2019 organizing committee secretary

POSITION STATEMENT

I plan to continue to develop the existing Society development strategy, as well as to promote its promotion among professionals in the relevant industry and in a wider audience. In particular, I believe that for this it is necessary to establish stable interaction between the individual Societies of the Section for holding joint conferences, workshops and other events that contribute to the exchange of experience and the implementation of common projects.
